DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, is drawn to a method of wedge bonding.

Group II, claim(s) 4-5 and 8, is drawn to a wire-bonding machine.

Group III, claims 6-7 and 11, is drawn to a bonding tool.

Group IV, claims 9-10 and 12, is drawn to a device.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The question of unity of the invention has been reconsidered retroactively by the examiner in view of the search performed; a review of US 3,591,838 Fujiwara et al, makes clear that the inventions of the groups I-IV lack the same or corresponding special technical feature because the cited reference appears to demonstrate that the claimed technical feature does not define a contribution which each of the inventions, considered as a whole, makes over the prior art.

Fujiwara teaches a semiconductor device that may be made by wedge-bonding but does not use the invention of the instant application. Accordingly, the prior art of the record supports restriction of the claimed subject matter in to the groups as mentioned immediately above.
